OBJECTIVE

Aspiring full-stack developer with hands-on MERN stack experience, RESTful APIs, and responsive front-end design, eager to grow in collaborative software teams.

SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS / Bootstrap, GSAP
- **Backend:** Node.js, Express.js.
- **Database:** MongoDB, Mongoose, SQL.
- **Version Control & Tools:** Git, GitHub, Postman.

PROJECT

1. Social Media Application

Developed a Social Media Web Application using the MERN stack with secure authentication and RESTful APIs. Implemented post creation, likes, comments, and real-time messaging features. Designed a responsive React frontend integrated with a Node.js and MongoDB backend.

2. E-Commerce Website

Developed an E-Commerce Web Application using the MERN stack with secure user authentication and RESTful APIs. Implemented product listing, cart management, order processing, payment integration and admin panel features. Designed a responsive React frontend integrated with a scalable Node.js and MongoDB backend.

INTERNSHIP

I completed a 45-day summer internship at App Work Technology, where I gained practical experience in MERN Stack development, building responsive web applications and strengthening my skills in MongoDB, Express, React, and Node.js.
